

Custom Software & AI, **Built to Ship.**

We design, build, and deploy production-grade web apps, SaaS platforms, and AI automation for businesses worldwide — one accountable partner, from first sketch to live product.

WHAT WE DO

Software Services, End to End

Web & SaaS Development

Custom web applications and multi-tenant SaaS platforms — CRMs, ERPs, portals, and dashboards built for real workflows.

AI & GenAI Integration

LLM-powered features, RAG systems, semantic search, and document AI embedded into your product — not bolted on.

Agentic & Voice Automation

Autonomous agents and AI voice systems that book, qualify, and support — wired into your tools and data.

Mobile Apps

Cross-platform iOS and Android apps with AI features, built to share a codebase and scale.

Automation & Integrations

n8n pipelines and API integrations that connect your systems and eliminate manual work.

Support & Maintenance

Ongoing iterations, performance tuning, and SLA-backed maintenance after go-live.

WHY TEAMS COME TO US

The Problems We Fix

Fragmented vendors

Separate shops for design, development, AI, and infrastructure — and you're left stuck managing all of them and stitching the pieces together.

AI with no ROI

Flashy demos that impress in a meeting but never reach production, never scale, and never move a business metric that matters.

Slipping timelines

Bloated scope, missed deadlines, and opaque communication — so you only hear about the problems far too late to fix them.

Generic templates

Off-the-shelf tools forced onto workflows they were never built for — poor adoption, frustrated teams, and wasted spend.

One partner. Full ownership. Software that actually ships.

WHY ESSENTIENT

Not Just Another Dev Shop

Typical freelancer / agency	Large consultancy	Essentient
Builds exactly what you spec	Builds what the team sells	Solves the actual problem
AI bolted on at the end	AI as a separate practice	AI-first architecture
Hourly billing, unclear scope	Time & materials bloat	Outcome-driven pricing
Disappears after delivery	Retainer lock-in	Long-term partnership
You own the coordination	Layers of governance	Single point of ownership

HOW WE WORK

A Process Built on Visibility

01

Discover

Requirements deep-dive, scope, architecture blueprint, and a clear estimate before we write code.

02

Build

Agile sprints with weekly demos of working software and a shared board you can watch in real time.

03

Deploy

Staging-to-production rollout, performance testing, security hardening, and hands-on go-live.

04

Scale

Iterations, optimization, and SLA-backed support once you're live.

ENGAGEMENT MODELS

Work With Us Your Way

01

Fixed Price

Defined scope, fixed cost, and an agreed timeline — you know exactly what you're paying before we start.

- Best for well-scoped projects
- Ideal first project together
- No budget surprises

02

Milestone-Based

Pay per deliverable as we ship. Progress and payment stay tied together at every stage.

- De-risks both sides
- Great for phased rollouts
- Momentum you can see

03

Monthly Retainer

Dedicated capacity on tap for ongoing development, iterations, and support.

- Predictable monthly cost
- Flexible, evolving scope
- Best for long-term builds

HOW WE DE-RISK YOUR PROJECT

You Always Know Where Things Stand

 Weekly demos

Working software every week — no surprises at the finish line.

 Shared project board

Live view of backlog, progress, and blockers. No status-chasing.

 You own the code

Full code and IP ownership from day one, with complete repo access.

 Documentation

Architecture and system docs at every stage — zero vendor lock-in.

 Acceptance criteria

Every deliverable has pre-agreed sign-off before we move forward.

 Support after launch

Maintenance contracts with defined response times.

CAPABILITIES

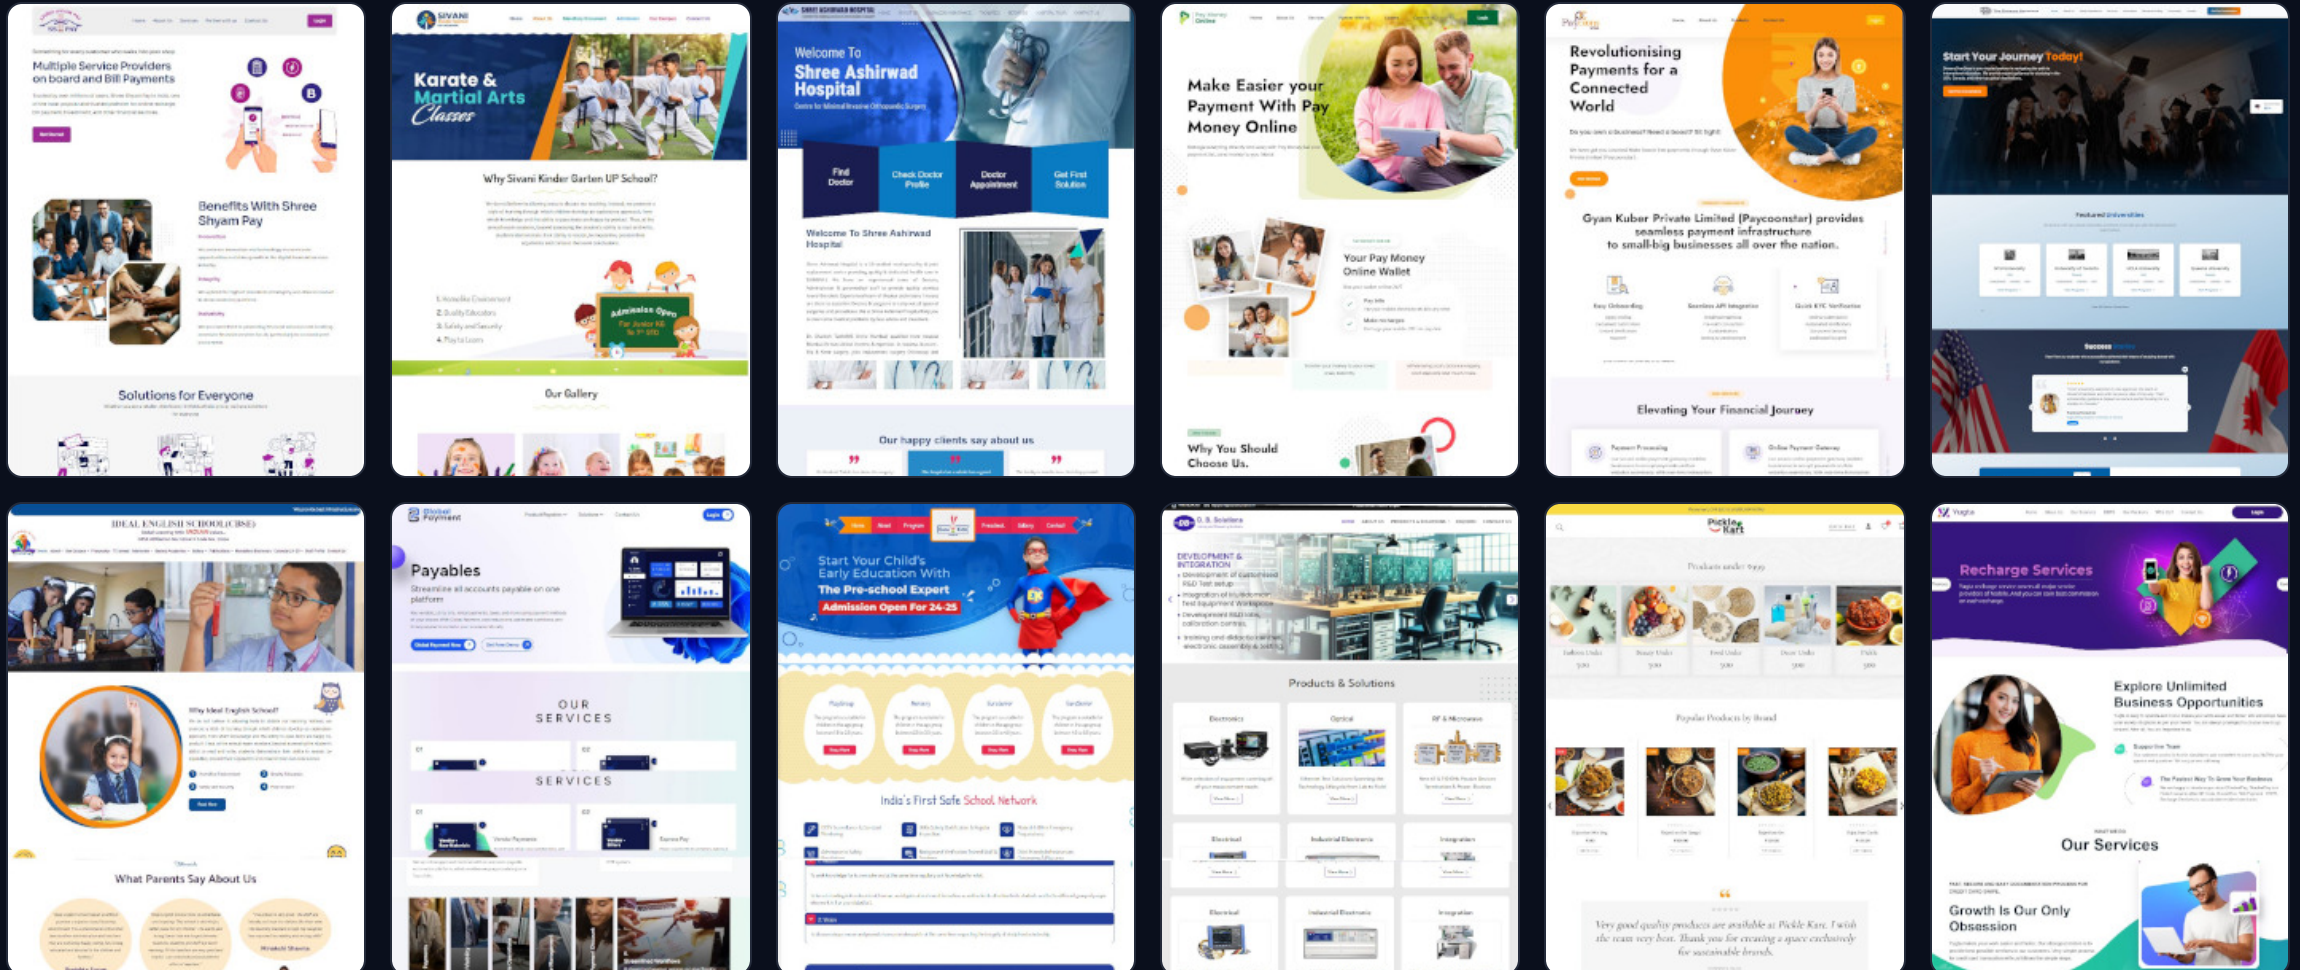

A Modern, Battle-Tested Stack

- ✓ Python / Node.js / TypeScript
- ✓ React / Next.js
- ✓ LLM integration (OpenAI, Claude, Gemini)
- ✓ RAG, vector DBs, semantic search
- ✓ React Native / Flutter
- ✓ PostgreSQL / MongoDB / Redis
- ✓ Voice AI & custom pipelines
- ✓ n8n & Make.com automation
- ✓ REST & GraphQL APIs
- ✓ Cloud: AWS, Azure, DigitalOcean
- ✓ CI/CD & containerized deployment
- ✓ Computer vision & ML models

Industries we serve: Healthcare, Education, Export/Trade, Real Estate, Legal, Manufacturing, and SaaS startups.

SELECTED WORK

A Glimpse of What We've Shipped

PROOF WE BUILD REAL PRODUCTS

We Don't Just Build for Clients — We Ship Our Own

An AI product platform we're building end-to-end — the same team that will build yours.

**Vartalap****IN DEVELOPMENT**

A conversational AI agent purpose-built for niche businesses — deployed on WhatsApp or web to handle queries, capture leads, and escalate intelligently.

**Vani****PRODUCTION-READY**

An AI voice-calling platform for inbound and outbound campaigns — appointment scheduling, lead qualification, and customer support with autonomous voice agents.

**Vishleṣhan****MVP ON CHROME STORE**

A privacy-first analytics tool — instant dashboards from CSV, Excel, and JSON files, processed entirely on-device. The MVP is live on the Chrome Web Store; the full product is in active development.

**Vanijya****IN DEVELOPMENT**

An AI-powered ERP for export-import businesses — ICEGATE integration, GST/LUT management, trade documentation, and AI compliance checks.

WHAT YOU GET

Senior-Led, AI-First, Fully Accountable

- ✓ A dedicated relationship manager and project manager as your single point of contact
- ✓ Clear, outcome-driven pricing with no runaway hourly bills
- ✓ A senior-led team that owns architecture, delivery, and outcomes end to end
- ✓ Full code and IP ownership handed to you
- ✓ AI built into the core — not a ChatGPT wrapper stuck on at the end
- ✓ Government-registered company (MCA, ROC), licensed for global software export
- ✓ Production-grade systems designed to scale, not throwaway prototypes
- ✓ Operating since 2022, serving clients across India, the US, and the UK
- ✓ Transparent communication and weekly working software
- ✓ Ready to serve clients across the GCC region

LET'S BUILD

Have a Project in Mind?

Start with a focused, no-pressure conversation about your challenge. We'll tell you honestly what it takes to build it right.
